

## CAUTION

As always, make certain that anyone shooting the SUB-2000 knows to avoid the rearward moving operating handle when shooting. The Operating Handle Cover is not designed to decrease injury from negligent use.

## PROBLEMS?

## NOTE

Operating handles after October 2009 (see below) have a wider base flange. Boil half a cup of water, immerse the 5/8" Operating Handle Cover for a minute to warm it, blow off the excess water, and it should slip on easily.

Complete installation instructions are enclosed.

## OPERATING HANDLE COVER

for the  
Kel-Tec SUB-2000  
9mm or .40 S&W

Provides a more ergonomic and comfortable finger grip on the SUB-2000 operating handle.

All materials are resistant to gun cleaners and lubricants and will not deteriorate, even after thousands of rounds.

Document Revision Date: 05MAY10

**1** The Operating Handle Cover will be installed on the SUB-2000 operating handle. There is no need for any disassembly of the SUB-2000. Make certain the SUB-2000 is unloaded, with the chamber empty and magazine removed.

**2** Start the top edge of the opening of the Operating Handle Cover over the operating handle. See the note in the panel above if installation is difficult.

**3** Push the Operating Handle Cover onto the operating handle.

**4** Go to the range, shoot, and enjoy.
